Systems
Software \LaTeX , Eclipse, GCC, GDB
Packages

Academic Projects

- 2013 **Machine Parsable RESTfull web API,**
*A RESTful web API is a web API implemented using **HTTP** and the principles of REST(Representational State Transfer).By using a **Microformats** -like grammar that helps to annotate semantics into the already existing documentation of REST services doubling them as **machine-readable** descriptions. Moreover, these basic annotations help to link between RESTful services in the same domain and enable automatic discovery and composition(creating **Mashups**).*
- 2011 **BOINCr-Graphical Interface to manage BOINC projects,**
*The Berkeley Open Infrastructure for Network Computing (BOINC) is an open source middle-ware system for volunteer and grid computing. The BOINCr provide a graphical interface(written in JAVA) to control BOINC server and to allow **easy deployment of BOINC apps** and work units..*
